

Blog Plugin

Blog management, with archive, tags and an RSS feed.

Anonymous · 21/08/2026

Blog plugin

Manages blog posts: listing, tag pages (`/blog/tags/{tag}`), a date archive (`/blog/archive/{archive}`) and an RSS feed (`/blog/rss.xml`).

Configuration (`services.yaml`)

Enabled under `derafu.content.config.plugins.blog`:

```
parameters:
  derafu.content.config:
    plugins:
      blog:
        path: 'resources/content/blog'
        blogTitle: 'Blog'
        postsPerPage: 10
```

Option	Type	Default	Description
<code>path</code>	string	<code>resources/content/blog</code>	Directory scanned for posts, relative to the website root.
<code>blogTitle</code>	string	<code>Blog</code>	Title used for the blog's own SEO metadata.
<code>blogDescription</code>	string	<code>Thoughts, stories, and the latest from our world.</code>	Description used for the blog's own SEO metadata.
<code>blogSidebarCount</code>	int	<code>5</code>	Number of recent posts shown in the sidebar.
<code>blogSidebarTitle</code>	string	<code>Recent posts</code>	Title of the recent-posts sidebar.
<code>include</code>	array of glob patterns	<code>['**.{markdown,md}']</code>	Files considered content, relative to path.

Option	Type	Default	Description
<code>exclude</code>	array of glob patterns	<code>[]</code>	Files excluded even if matched by <code>include</code> .
<code>postsPerPage</code>	int	<code>10</code>	Posts per page in the listing.
<code>showReadingTime</code>	bool	<code>true</code>	Whether to show the estimated reading time.
<code>feedOptions</code>	array	see below	RSS feed configuration (<code>/blog/rss.xml</code>).
<code>showLastUpdateAuthor</code>	bool	<code>true</code>	Whether to show who last updated the post.
<code>showLastUpdateTime</code>	bool	<code>true</code>	Whether to show when the post was last updated.
<code>tags</code>	array of strings, or string	<code>[]</code>	Predefined tags for the blog.
<code>onInlineTags</code>	<code>ignore log warn throw</code>	<code>warn</code>	What to do when a post uses a tag that isn't in the predefined tags list.

feedOptions

Option	Type	Default	Description
<code>limit</code>	int	<code>20</code>	Number of posts included in the feed.
<code>title</code>	string	<code>blogTitle</code>	Overrides the feed title.
<code>description</code>	string	<code>blogDescription</code>	Overrides the feed description.
<code>copyright</code>	string	<code>none</code>	Copyright line of the feed.
<code>language</code>	string	<code>none</code>	Feed language.
<code>sortPosts</code>	<code>descending ascending</code>	<code>descending</code>	Sort order of the posts in the feed.

Content frontmatter

Blog posts use the [generic content frontmatter](#), with one override:

Field	Type	Default	Description
<code>hide_table_of_contents</code>	bool	<code>true</code>	Overrides the generic default of <code>false</code> — blog posts hide the table of contents unless explicitly re-enabled.
