Derafu Form

Pages in this section

- **Introduction** — PHP form library with declarative JSON Schema and UI Schema definitions, rendering, validation and CSRF protection
- **Translations** — Translations
- **CSRF Protection** — The CSRF token of the forms, and the errors of a form as a whole
- **Captcha** — The captcha of the forms of derafu/form, with the provider of the application
- **Validation** — How the rules that process the data of a form are derived from its schema, and what each keyword of the schema validates
- **Required Fields** — How a field is required, how its label and its control say it, and how the browser asks for it
- **Rendering Options** — Where the options of an element come from, which one decides, and the options of the layouts, the groups and the columns
- **Examples** — Examples of how to use the form component.
- **Service Configuration** — Form rendering services, isolated Twig and tagged contributions
